SOLE F63 Basement Ceiling Worksheet

2026 model: get the missing belt-height and headroom answers from SOLE before ordering.

1 / YOUR ROOM AND THE PERSON USING IT

Exact F63 model year / SKU: _____

Lowest overhead height above running area (in): _____ Mat thickness, if any (in): _____

Tallest user's height in running shoes (in): _____ Planned incline / setting: _____

Lowest obstacle (beam, duct, light, etc.): _____

2 / QUESTIONS TO SEND TO SOLE (KEEP THE RESPONSE)

For my exact 2026 F63, what is the walking-belt height above the floor at the place my feet normally land, both level and at my highest planned incline?

Level (in): _____ Planned incline (in): _____

How much additional overhead clearance does SOLE require for walking/running at that incline? Does its answer include normal vertical body movement?

SOLE's required allowance (in): _____

Is my exact room, floor, outlet and proposed use acceptable under the 2026 manual?

Support representative / date / case number: _____

3 / CALCULATE ONLY AFTER SOLE CONFIRMS THE INPUTS

Lowest overhead height - user height in shoes - verified belt elevation

= standing space above head at that position and incline

Calculated standing space (in): _____ SOLE overhead allowance (in): _____

Include mat thickness once, in belt elevation or floor reference, not both.

A positive number does not certify safe clearance. SOLE must confirm the full setup.

4 / THE REST OF THE FIT CHECK

- ☐ Rear area clear: 75-in machine + at least 42 in behind = 117 in before front access
- ☐ Full manual clearances, level floor, electrical circuit and outlet confirmed
- ☐ Doorways, stairs, boxed delivery route and assembly arranged
- ☐ Written installation answer and current return/freight terms saved

☐ Ready to order after confirmation ☐ Still need information ☐ Use another setup

No verified belt height or SOLE headroom allowance? Stop here and ask before buying.
